

Project Area Aggregated* Travel Patterns Two-Hour PM Peak Period

* Aggregated trips include all trips using any modeled roadway facility in the area except those that only use the freeway system (I-5 and I-205)

Definitions:

Through Trips - Movement of people and goods between locations outside the project area but that pass through the project area

Regional Trips - Movement of people and goods between locations outside the project area and locations within the project area

Local or Project Area Trips - Movement of people and goods between locations within the project area

Not to Scale
